HIGHLAND PARK GRASS SEED makes a velvet-like lawn,
green the entire season

TERRACE GRASS SEED quickly forms a deep-rooted turf
and holds the bank in place

Grass Seeds for Your Lawn

When you buy grass seed for your lawn be very particular about quality. Poor seed is very expensive, not only is a large proportion of it chaff and dirt but very often it contains weed seeds, that, once in your lawn will make you endless trouble. These Grass Seed mixtures we offer you are of very high quality. They contain varieties of domestic and imported grass seeds in correct proportions and will make a lawn you will be proud of.

For a clover lawn you will find our Highland Park Mixture particularly good. If you wish a lawn without clover we recommend our Bent Lawn Grass Mixture. Directions for lawn making are sent with each lot of seed.

Highland Park Grass Seed

MAKES THE FINEST LAWNS

This mixture has proven its worth by producing beautiful and permanent lawns for the city home, country estate and public park. It is a careful blending of varieties of short, fine-leaved grasses and a correct percentage of pure white clover, and will make a thick, deep-rooted, velvety evergreen sod that will hold the moisture and remain fresh and green during the dry season in summer. This is our most popular Grass Seed mixture. It has proven its quality not only on the smaller lawn of the city and suburban home, but has been and is being used with splendid results in many of the city parks, cemeteries and large estates. Professional Landscape Gardeners specify that they will use Highland Park Grass Seed when submitting plans to particular patrons. The name "Highland Park" is a symbol of quality. Sow at rate of one pound to each 20 sq. ft. For renewing old lawns use half this amount. Price per lb. 50c; 3 lbs. \$1.40; 5 lbs. \$2.25; 10 lbs. \$4.25; 20 lbs. (1 bushel) \$8.00. Add 5c per pound if we are to prepay Parcel Post or Express Charges.

Rochester, N. Y., is noted all over the country for its unusually fine lawns. We point with no little pride to the fact, so well known throughout this city, that our grass seeds have played an important part in the making of these splendid grass plots.

Shady Nook Mixture

On many lawns there are unsightly bare spots under trees and between adjoining houses where it is impossible to get the ordinary lawn grasses to grow. This mixture is made up of short-growing, fine-leaved grasses that will give you an evergreen sod in the most densely shaded spots. Often the soil is sour and moss grown in such places and should be treated with lime, 50 lbs. to the 1000 sq. ft. Price of Shady Nook Mixture, per lb. 60c; 3 lbs. \$1.70; 5 lbs. \$2.65; 10 lbs. \$5.00; 20 lbs. \$9.50. Add 5c per pound if we are to prepay Parcel Post or Express Charges.

Terrace Grass Mixture

Banks and terraces need deep rooting, very hardy grasses to hold them in place. In this special mixture we have combined varieties of very strong-rooted grasses that will not only quickly form a thick, matted sod that will keep the bank from washing out in heavy rains, but one that will remain fresh and green all season. We recommend sowing grass seed for terraces at the rate of one pound to each 200 sq. ft. Price per lb. 50c; 3 lbs. \$1.40; 5 lbs. \$2.25; 10 lbs. \$4.25; 20 lbs. \$8.00. Add 5c per pound if we are to prepay Parcel Post or Express Charges.

Bent Lawn Grass Mixture

This Mixture Is Made Without White Dutch Clover

To meet the demand for a grass seed mixture that will make a lawn around the home like a putting-green on a golf course, we have combined in this formula the seeds of grasses that not only produce the finest leaf blades, but varieties that creep, causing them to mat together and make a soft luxuriant turf that remains evergreen throughout the entire season. When preparing the soil for this particular Grass Seed Mixture, we recommend the use of Bonemeal, 100 lbs. to every 500 square feet, well worked into the soil before the seed is sown. After the grass is up apply Sulphate of Ammonia, 1 lb. dissolved in 10 gallons of water, to every 100 square feet. Sow seed at the rate of one pound to every 250 square feet. Prices $\frac{1}{2}$ lb. 40c; lb. 75c; 3 lbs. \$2.10; 5 lbs. \$3.25; 10 lbs. \$6.00; 25 lbs or more @ 55c per lb.

We Prepay All Charges on This Mixture

Brown Patch in lawns, golf courses, bowling greens, etc., can be controlled by the use of Semesan. A booklet has been published on this subject that we will be very glad to send to you.

No weeds in this lawn, it was made with Highland Park Grass Seed Mixture.

Genesee Valley Putting Green Mixture

A combination of imported and domestic grasses carefully chosen for their fineness of leaf blade and for their low growing qualities. This mixture will make an absolutely smooth turf of velvet-like texture, so necessary for the perfect putting or bowling green, tennis court or croquet ground. This superfine mixture is also growing very popular for the making of very fine lawns. Price per lb. \$1.00; 3 lbs. \$2.70; 5 lbs. \$4.35; 10 lbs. \$8.50; 25 lbs. \$20.00; 100 lbs. \$75.00.

We Prepay All Charges on This Mixture

Pure White Dutch Clover for Lawns

This is the clover to sow on lawns. It is low growing, forms a mat-like sod and remains green all season. Particularly useful on sandy soils, especially where lawns are to be built at the lake or seashore. One pound of seed mixed with two quarts of sand or fine soil to insure an even distribution, will sow 100 square feet. Oz. 10c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; lb. 65c; 10 lbs. \$6.25; 25 lbs. \$15.50; 100 lbs. \$60.00. Prepaid to You at These Prices

Royal Bouquet
Verbena

Snow White

Hardy Gypsophila

A serious drawback to the usefulness of the popular Double Perennial Gypsophila has hitherto been that it is not really a pure white. After a number of years of selection this strain is introduced whose flowers are absolutely pure white and produces a larger percentage of double flowers than the old Hardy Gypsophila. Seed pkg. 25c each; 2 for 40c.

Mignon Dahlias

Coltness Hybrids

Royal Bouquet Verbena

If you have ever grown Verbena yourself or have seen them growing in some friend's garden, you have thought what a gorgeous bed these brilliantly colored flowers would make if they only grew on strong, upright plants instead of having their carpet-like creeping habit. It forms a plant 15 to 18 inches high and not more than 10 inches across and holds its giant, brightly colored blossoms perfectly erect. Seed pkg. 25c each; 2 pkgs. 40c.

Sow Sweet Pea seed as soon as the ground can be worked in the spring. Dig a trench about a foot wide and deep, and fill in with 6 inches of well rotted manure. If no manure is available spread thickly with bone meal or sheep manure. Replace soil in the trench to within 4 inches of the top. Plant the seeds in a zigzag row 2 to 3 inches apart, covering with 1 inch of soil. Thin plants to stand 6 inches apart when 4 inches high. When cultivating gradually fill trench to the top with soil. Celery seed is very slow in germinating and should be sown in March in flats under glass and kept moist. When plants are 2 inches high, thin out and transplant to stand 3 inches apart each way. When 5 inches high, set out, 6 inches apart, in trenches 6 inches deep. Cut off outer leaves and press soil firmly about roots. Cultivate thoroughly. When full grown, blanch by mounding gradually with earth or by pressing stems together by board on both sides of row. For winter storage, take up the plants with roots and place upright on wet soil in a dark cellar or root-house, packing closely. Those who grow celery for market will be interested to know that we have a proven strain of the old Original Dwarf Golden Self-Blanching Celery. Send for our Market Gardeners' Catalog.

Hart & Vick's Radish

One package of seed will sow a 15-foot row, one ounce 60 feet

This is another vegetable that loses about half its flavor if not eaten within a very short time after it is taken from the ground. Radishes wilt, like flowers and other vegetables, and lose their fresh crispness and juicy, delicate flavor. You can't know how really good radishes are if you haven't gone out in the garden in the early morning and pulled a few for your breakfast.

For forcing, sow in hotbed or under glass in rich, sandy loam. Scatter 50 to 100 seeds to the foot and cover with $\frac{1}{2}$ inch of soil sifted on. Sow in garden, as early as possible, in rows about 12 inches apart and thin to prevent crowding. A good dressing of nitrate of soda will greatly help their growth and make them tender and crisp. Successive sowings every week or 10 days will keep your table well supplied the entire season.

Valuable for cutting, combining especially well with the blue flowers of the Delphinium. Hart & Vick's Delphinium

These are the most popular of all the Hardy Plants for the garden. The tall spikes of lovely blue flowers standing erect above the dark green foliage make a wonderful sight. They begin to bloom in June and by cutting the plants to the ground as the crops of flowers fade, a second and third lot of bloom may be had. The flower stalks are very brittle and should be staked to keep them from being blown over by the wind. Fertilize well around the roots with bone-meal and in the late fall sift coal ashes over the crowns to protect them from grubs. Plant several clumps of these in your garden.

Belladonna. Freest and most continuous bloomer of all, flowers from the end of June until after frost. Plants 2 to 3 feet high, bearing mammoth spikes of turquoise-blue flowers. 30c each; 80c for 3; \$3.00 for 12.

Plants of the New Dazzler Gaillardia, 25c each; 75c for 3; \$1.25 for 6.

Hollyhocks

Stately, majestic, hardy plants from 6 to 8 feet high, which are a necessary part of every old-fashioned garden, and should also find a place interspersed with shrubbery, as clumps on the lawn or in the mixed border, where their colossal spikes of bloom produce bold and showy effects, which cannot be secured with any other flowering plant.

The Hollyhock requires a deeply dug, well-drained soil, enriched with thoroughly decayed manure, and should be liberally supplied with water during dry weather. A slight protection throughout the winter will be beneficial. An occasional spraying with Bordeaux mixture, which should be applied early in the growing season, usually prevents disease, which is prevalent in some localities.

A Giant Flowering Canna

Summer Flowering Bulbs

The bulbs offered on this page include some of our showiest garden flowers. They are of easiest culture; planted in spring in good garden soil, they flower with great certainty during the summer and fall. After the tops have been killed off by frost, all of the bulbs (with the exception of Cinnamon Vine) should be taken up and stored in the cellar over winter.

If the planting season should have become well advanced, those who have neglected to plant flower seeds will find that they may still have sightly flower beds on the lawn or in the garden by planting these bulbs. They also add a dash of color to the hardy border.

The Beautiful Tuberous Rooted Begonia

Giant Hybrid Amaryllis

Of all bulbs to grow indoors these are the most beautiful and easiest to bring into flower. These new hybrids are enormous in size and gorgeous in coloring. Pot the bulb in good loam, well fertilized, water and put in a dark, cool place for four weeks, then bring to heat and sunlight. After flowering rest the bulbs for another season. Jumbo bulbs, 90c each; 3 for \$2.55; 12 for \$9.45.

Poppy-Flowered Anemones

These beautiful Anemones embrace such a remarkable range of fine colors that they are very desirable for both garden display and cut flowers. The plants grow 8 to 10 inches tall and produce large, single to double poppy-like flowers. They are perfectly hardy and easily grown, and can be planted in either spring or fall. Set the bulbs 2 to 3 inches deep and 6 inches apart in a fine, well-drained soil.

St. Brigid (Mixed Colors), 15c each; \$1.00 per doz.; \$7.50 for 100.

Golden Yellow Calla Lily

The variety offered below succeeds best when treated in the same manner as gladioli, tuberoses and other summer-flowering bulbs. They should be planted in the open border in a dormant condition when danger from frost is over in spring, and will then flower during the summer months. When the tops are killed by frost in the autumn, dig and store through the winter as you would potatoes.

Elliottiana. This is the best of the Yellow Callas, its flowers being as large as the popular white, winter-flowering variety, and of a rich, lustrous golden yellow of velvety texture; the foliage is dark green, with a number of translucent creamy white spots, which add much to its beauty. Strong bulbs, 30c each.

Tuberous Rooted Begonias

What a wonderfully beautiful and useful flower so many people are missing when they neglect to grow some of these Tuberous Begonias. Improvements made in recent years have so improved their size, color and texture that we now have flowers from 4 to 6 inches across in colors ranging from the richest crimsons and scarlets, through orange, yellow and delicate pinks down to the purest whites. As outdoor bedding plants for shady places they are unrivaled. In window and porch boxes, in half-shady spots they do wonderfully well. Planted in pots for winter house flowers they are very fine.

They are easily grown. Just start the bulbs indoors during March or April and set out when all danger of frost is past. Set the plants a foot apart and give them plenty of fertilizer and water. In the fall dig, spread out to dry and keep over winter in sand in a cool place.

Cinnamon Vine

No other vine will cover a trellis, fence or arbor more quickly or satisfactorily than this easily grown climber from China. It will grow from 15 to 30 feet high the first season and higher in succeeding years. The handsome foliage is dark green, thick and glossy, while the racemes of white blossoms emit a delightful cinnamon-like perfume. This vine is perfectly hardy, thriving in all soils, wet or dry, in the sun or shade, and absolutely free from disease, blight or insects.

Caladium Esculentum

Elephant's Ear

This giant plant grows six to ten feet high and bears immense light green leaves three to four feet long and two and one-half feet wide. It is very effective in beds and borders and is used extensively in public parks where their decorative value is greatly appreciated. Hyacinthus Candicans

Summer Hyacinth

A luxuriant growing, summer-flowering Hyacinth, whose plants are 2 to 3 feet across and bear, during July and August, 20 to 30 white, bell-shaped flowers on tall stems 3 and 4 feet high. Plant them as a background to lower growing perennials or in the centers of beds. Take up the bulbs in the fall and keep as you would Gladiolus, in a cool, dry place. SUMMER FLOWERING BULBS—Continued

Maderia Vine

The old favorite "Climbing Mignonette" so much prized on account of its rapid growth and freedom from disease and insects. A splendid vine for covering porches, pergolas, fences, etc., where its thick, heart-shaped, glossy, light green leaves and long hanging stems of feathery, fragrant, white flowers are very effective. A free and constant bloomer. Strong tubers, 15c each; \$1.50 a doz. Postpaid.

Montbretias

Visitors at the Flower Show at the Rochester Exhibition last fall will remember the gorgeous colorings in the several vases of Montbretia in our exhibit. This most showy of summer-flowering bulbs produces numbers of long, graceful spikes of brilliant star-shaped flowers, 1½ to 2 inches across, scarlet, orange and vermillion, dotted and spotted with yellow, purple and maroon. Plant these in clumps of 12 or 15 bulbs set 6 inches apart and they will make a splendid display in your garden.

Mixed hybrids, 10c each; \$1.00 a dozen; \$7.00 for 100. Postpaid.

Hardy Garden Lilies

All hardy borders should have some of the various kinds of Lilies scattered through them. Here they do their best, as they get the benefit of the shade of the nearby plants which is so necessary for successful growing. Plant these lilies in the early spring as soon as the frost is out of the ground. Set them 5 to 8 inches deep and allow a foot of space between them.

Auratum. This lily is sometimes called the Gold Banded Lily of Japan. It is one of the finest of all lilies with its large, graceful, fragrant flowers of delicate ivory white color, thickly spotted with chocolate-crimson and striped through the center with golden yellow. Grows 3 to 5 feet high and blooms from July to September. Extra large, strong bulbs, 45c each; \$1.25 for 3; \$4.50 per dozen. Postpaid.

Henryi. This new and very beautiful lily comes from China. It is a strong, hardy, healthy grower and one of the finest for the garden. The stalks, 4 to 5 feet high, carry 6 to 8 blossoms each of a rich apricot yellow, lightly spotted with brown. Giant bulbs, 65c each; \$1.80 for 3; \$6.50 per dozen. Postpaid.

Regale. A new hardy Lily with a waxy white petal striped with pink and a lemon yellow throat. The trumpet is about in 6 inches long and when the flower is fully developed, it is about 7 inches across. The blooms, we might say, are almost leathery in substance; for decoration as a pot plant or for cutting no other variety approaches it. The flower when cut or if left on the plant, possesses wonderful keeping qualities. It has a wonderfully delightful perfume, somewhat resembling the variety, *Lil. Auratum*, and yet somewhat like a *Gardenia*. If you want the finest of the hardy lily family, plant some of this variety. Strong bulbs, that will flower the first season, 75c each; doz., \$8.00; \$60.00 per 100. Prepaid to you.

Speciosum Album. This large white Japanese Lily with a greenish band running through each petal is a splendid plant for the Hardy Border. It flowers late in the season and its clusters of bloom around the graceful stems and its fine green foliage set it off to wonderful advantage. Very large, strong bulbs, 50c each; \$1.35 for 3; \$5.00 per dozen. Postpaid.

Speciosum Magnificum. Words cannot describe the beauty of this variety. Frosted white, spotted, clouded and bordered with deep pinkish crimson. A much superior variety to the Roseum, Rubrum or Melpomene of the Speciosum type. For the border, among hardy plants or naturalized among the rhododendrons, this is an equal favorite with the handsome *Lilium auratum* offered above. Splendid for pot culture as well. Blooms outside during August. Large bulbs, 50c each; \$1.35 for 3; \$5.00 per dozen. Postpaid.

Speciosum Rubrum. Another Japanese Lily with delicate pink flowers heavily spotted with rich crimson. Very hardy, grows 3 feet high and flowers in August and September. One of the old garden favorites. Extra large bulbs, 50c each; \$5.00 per dozen. Postpaid.

Superbum. In a collection of best plants of all countries, our native Superbum Lily would deserve a first place. In deep, rich soil it often grows 8 feet high, with twenty to thirty flowers. It is of the easiest culture, and may be grown as a wild flower in any swampy or rough part of a place where the grass is not mown. Extra-selected bulbs, 35c each; \$1.00 for 3; \$3.00 per dozen.

Tigrinum Splendens. The old-fashioned single Tiger Lily with its petals of orange-red spotted with black. Very showy and grows 4 to 5 feet high. Bulbs 35c each; \$3.50 per dozen. Postpaid.

Tigrinum Flore Plena. Same as above except with double flowers. Bulbs 35c each; \$3.50 per dozen. Postpaid.

Oxalis

A splendid little plant for borders, pot growing and for Baskets. They are dwarf and compact growing and bloom profusely from June until frost. Plant the bulbs in May after danger of frost is over, and dig and store for winter in the fall. The varieties Deppi and Shamrock have foliage resembling a four-leaf clover.

Ants Destroyed

New method "gets" them at their source—safe, permanent, effective.

The Antrol system is adapted to any size house or garden and quickly destroys all species of sweet eating ants. It is composed of small glass containers and a special formula of syrup. The containers are partially filled with syrup and placed about the outside edges of the house or along "ant" trails in the garden if the infestation occurs there. The ants smell the syrup, eat it and then transmit its mild poison to the queen in the nest. Soon the entire ant colony is destroyed!

The complete system should cover every 15 feet around the outside of the house or "ant" trails in the garden. Once installed permanent, effective and safe protection is insured from these annoying pests. Prices—Antrol sets containing 4 containers and 1 4-oz. bottle of syrup, \$1.00; Antrol extra containers (each), 15c; Antrol syrup, 4-oz. bottle, 50c; pints, \$1.00; gallons, \$4.00.
